

# Interview

Question: what do you do with your mask while not using it?

Student A: put it into pocket and do other things, when he go outside again ,he take the mask out of the pocket and wear it directly.

Student B: put it on the desk when he study. It may even land on the ground accidentally. So when he go out, he may need to use a new mask.

Student C: he doesn't even know where he put his mask several minutes ago. So he use a new one every time.

(student B's word is what most people say)

Question: if there is a new machine which can keep the mask and it is easy to carry. What do you think?

Student A: it may be helpful but I think pocket is safe and clean enough. (in fact, it's not)

Student B: he think he cry out for it and he can save many masks.

Student C: he don't need it because he have enough masks.

(student B's word is what most people say)
